

Transfer Guide

Community College to Wheaton College

This document is intended to help students who wish to begin at a Community College, and later transfer to Wheaton College, plan for courses that will meet Wheaton requirements.

Core Competencies:

Foreign Language - Wheaton College requires completion through the Intermediate Level to meet competency.

Oral Skills - Public Speaking or Argumentation & Debate are the two courses that meet this competency.

Writing - At most Community Colleges, taking Composition I and II would be the path to fully meet Wheaton's Writing competency.

Thematic Core:

Choose up to 4 of the following categories, which we call themes. A **maximum of 4 themes** can be met with transfer credit. Courses on the list beyond 4 themes would come in as elective credit and count as hours toward the 124 needed to graduate.

AAQR (Math) - Calculus 1, if needed for your intended major. If not, Finite Math, Pre-calculus (with Trigonometry) or Elementary Statistics are options to meet the requirement.

Scientific Practice (Lab Sciences) - Survey of Biology, Introduction to Geology, Introductory or General Physics are easily transferable lab Science courses. If majoring in Biology, Chemistry or Applied Health Science, take courses designated for Science majors. We do not recommend taking Anatomy & Physiology courses because they will not meet the requirement for the Biology Pre-Med or Applied Health Science majors at Wheaton. Engineering & Physics majors should begin with a calculus-based Physics sequence.

Literary Explorations - Introduction to Literature, British Literature or World Literature.

Visual & Performing Arts - Art Appreciation and Music Appreciation (need both to complete the theme).

Historical Perspectives - World History

Philosophical Investigations - Introduction to Philosophy

Social Inquiry - One from Introduction to Anthropology, Principles of Microeconomics, American Politics & Government, Comparative Politics, International Relations, Introduction to Psychology, or Introduction to Sociology.

Major Courses:

Round out your schedule with entry level courses in a major you are interested in pursuing.

Wheaton College requires a certain number of courses in the major be taken at Wheaton, so it is best not to take a large number of major courses.

* We do not transfer associate degrees; transfer credits are course by course.

1 quarter hour = .667 semester hour.

Please consult the Wheaton College Catalog online for information on the Christ at the Core General Education Program and Major requirements at www.wheaton.edu/catalog.
